ABOUT ME

Business Intelligence and Analytics professional with hands-on experience in building end-to-end data solutions, interactive dashboards, and analytical applications. Skilled in transforming raw data into actionable insights through Power BI, SQL, Python, and data visualization techniques. Experienced in developing mobile and web applications using Flutter, Firebase, and Flask, with practical exposure to Machine Learning and AI-powered solutions. Passionate about solving real-world problems through data, analytics, and technology.

EDUCATION

Bachelor of Artificial Intelligence
Developing strong foundations in Artificial Intelligence, Data Analytics, Machine Learning, Database Systems, and Business Intelligence with hands-on experience in real-world analytical projects.

2023 - 2027
Delta University

TRAINING EXPERIENCE

NVIDIA DLI Summer Training Program – Generative AI
Completed hands-on training in Python Fundamentals and Generative AI concepts. Explored Prompt Engineering techniques for building effective AI-powered applications. Developed practical understanding of LLMs, Retrieval-Augmented Generation (RAG), and AI application workflows. Applied AI tools and methodologies to real-world use cases and business scenarios.

Sep 2025 – Oct 2025
Information Technology Institute (ITI)

SELECTED PROJECTS

- SuperStore Advanced Analytics Platform**
2026–Present
- Built an enterprise-grade Power BI analytics platform combining historical reporting with a real-time What-If simulation engine for strategic decision-making
 - Designed a Star Schema data model (1 fact table, 6 dimension tables, 4 What-If parameter tables) with dedicated Calendar and business hierarchy dimensions
 - Developed advanced DAX measures using SWITCH(), SELECTEDVALUE(), and VAR for dynamic KPIs including YoY Growth, Sales Gap, Profit Contribution %, and Best/Worst Product identification
 - Engineered a What-If simulation engine letting users adjust price, discount, quantity, and cost in real time and instantly see the profit impact via waterfall decomposition
 - Delivered 3 interactive dashboards (Executive Overview, Product Performance, What-If Analytics) with tree maps, drill-down, and scenario comparison
- Uber Ride Analytics Dashboard**
2025–Present
- Built a 5-page Power BI dashboard analyzing 150,000+ ride records across 10+ features (bookings, vehicles, customers, locations)
 - Modeled relational data and time intelligence to support monthly/quarterly trend analysis
 - Developed DAX measures for cancellation rate, revenue risk %, revenue per km, and customer segmentation (first-time, returning, regular)
 - Delivered location and time-slot demand heatmaps to support pricing and driver-allocation decisions

Airline Route Profitability Analytics
2026–Present

- Engineered an end-to-end ETL pipeline in Python (Pandas) to extract, clean, and transform 9 relational tables from a SQLite operations database into an analysis-ready dataset
- Designed a Star Schema data model in Power BI with a dedicated Calendar dimension, connecting flights, bookings, tickets, and cost data
- Developed 25+ DAX measures covering revenue, a 10-category cost breakdown, profit margin, and load factor
- Built 4 interactive dashboards (Executive Overview, Operations, Passenger & Booking, Aircraft Analysis) featuring a revenue-to-profit waterfall and drill-through decomposition tree

TECHNICAL SKILLS

Data Analytics & BI

- | | | |
|-----------------|--------------------|-------------------------------------|
| • Data Analysis | • Data Cleaning | • Data Visualization |
| • Power BI | • KPI Development | • DAX |
| • Power Query | • What-If Analysis | • Interactive Dashboard Development |

Programming & Development

- | | | | |
|----------|-------------|------------|------------------------|
| • Python | • SQL | • Flutter | • Statistical Analysis |
| • Flask | • REST APIs | • Firebase | • Data Storytelling |

CERTIFICATIONS

Make an Impact with Data Analytics	IBM
Generative AI	NVIDIA
Building LLM Applications With Prompt Engineering	NVIDIA
From Basics to GenAI Practice	NVIDIA
Python Programming Basics	Information Technology Institute (ITI)
Generative AI in Action: Case Studies and Future Outlook	Manara

LEADERSHIP & ACTIVITIES

Microsoft & Nile University	DeepX 2026 Hackathon
-----------------------------	----------------------

LANGUAGES

- Arabic (Native)
- English (Professional Working Proficiency)
