ABOUT ME

Business Intelligence and Analytics professional with hands-on experience in building end-to-end data solutions, interactive dashboards, and analytical applications. Skilled in transforming raw data into actionable insights through Power BI, SQL, Python, and data visualization techniques. Experienced in developing mobile and web applications using Flutter, Firebase, and Flask, with practical exposure to Machine Learning and AI-powered solutions. Passionate about solving real-world problems through data, analytics, and technology.

EDUCATION

Bachelor of Artificial Intelligence
Developing strong foundations in Artificial Intelligence, Data Analytics, Machine Learning, Database Systems, and Business Intelligence with hands-on experience in real-world analytical projects.

2023 - 2027
Delta University

TRAINING EXPERIENCE

NVIDIA DLI Summer Training Program – Generative AI
Completed hands-on training in Python Fundamentals and Generative AI concepts. Explored Prompt Engineering techniques for building effective AI-powered applications. Developed practical understanding of LLMs, Retrieval-Augmented Generation (RAG), and AI application workflows. Applied AI tools and methodologies to real-world use cases and business scenarios.

Sep 2025 – Oct 2025
Information Technology Institute (ITI)

SELECTED PROJECTS

SuperStore Advanced Analytics Platform
Built an enterprise-grade Power BI solution using Star Schema modeling, advanced DAX measures, and interactive What-If simulations.
Developed profitability drivers analysis, YoY metrics, KPI framework, and scenario planning tools for executive decision-making.

14 Jun 2026
20 Jun 2026

AI-Powered Mobile Application for Intelligent Gait Analysis, Fall Risk Assessment, and Freezing of Gait Detection
Developed an AI-powered healthcare application using Flutter, Flask, Firebase, and Computer Vision for gait analysis and fall risk assessment.
Built multiple AI models including Fall Risk Prediction, Freezing of Gait Detection, and Explainable Gait Anomaly Localization using TensorFlow, OpenCV, MediaPipe, and Scikit-Learn.
Designed a scalable cloud-based architecture supporting authentication, real-time analysis, historical tracking, and healthcare reporting.
Delivered an end-to-end solution combining Mobile Development, Machine Learning, Deep Learning, and Healthcare Analytics.

Mar 2026
Jun 2026

TECHNICAL SKILLS

Data Analytics & BI

- Data Analysis
- Power BI
- Power Query
- Data Cleaning
- KPI Development
- What-If Analysis
- Data Visualization
- DAX
- Interactive Dashboard Development
- Statistical Analysis
- Data Storytelling

Programming & Development

- Python
- Flask
- SQL
- REST APIs
- Flutter
- Firebase

CERTIFICATIONS

Make an Impact with Data Analytics	IBM
Generative AI	NVIDIA
Building LLM Applications With Prompt Engineering	NVIDIA
From Basics to GenAI Practice	NVIDIA
Python Programming Basics	Information Technology Institute (ITI)
Generative AI in Action: Case Studies and Future Outlook	Manara

LEADERSHIP & ACTIVITIES

Microsoft & Nile University	DeepX 2026 Hackathon
